

A World of Animal Friends Children's Program Summer 2011

Presented by Holly Carine
Geauga-Trumbull Solid Waste
Management District
www.startrecycling.com

Students will learn about different animals and what part of the world they are from. They will select a hat from around the world to wear while listening to the story "*Children of the Earth Remember*" A discussion will follow on ways to keep our earth healthy.

Students will play a guessing game to discover what animals are from their "hat's" region. They will receive sticker sheets of continents and animals to help identify animals of the world.

Students will then decorate canvas animal puppets with fabric markers. They will choose from zebras, tigers, or lions.

Recycling information will be sent home with all student participants.
